Period for Reply	1 F =							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

### Drawings

- The drawings are objected to because indications such as "actual size" or "scale 1/2" on 1. the drawings are not permitted ("drawn to scale" in the current application) since these lose their meaning with reproduction in a different format. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR

Application/Control Number: 10/695,612 Page 3

Art Unit: 2859

1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Specification

3. The disclosure is objected to because of the following informalities: In the specification at page 1 the reference to the parent application needs to updated to the current status of the application.

Appropriate correction is required.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueki in view of Engel.

Ueki substantially discloses a measuring system as claimed by modifying an existing scale (US standard scale or Japanese linear system) to conform to another type of scale (metric).

Specifically, for the US standard scale the US foot is modified to equal 30 metric centimeters which conforms the US scale to the metric scale to bring the scales into alignment, but lacks the US foot being a base 10 system and modifying both the US standard system and the metric

Application/Control Number: 10/695,612 Page 4

Art Unit: 2859

system to a new third system. Engel teaches using a base 10 US standard system along with various old and well known fractions. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a base 10 system for the modified US system in Ueki to better conform the modified US standard system to the Metric system as taught by Engel to better conform the modified US system to the metric system since the metric system is a base 10 system. It also would have been obvious to one of ordinary skill in the art at the time the invention was made to extrapolate the teachings of the combination of Ueki and Engel to modify both the US standard system and metric system (as well as the Japanese standard system) to another scale to conform all the well known scales for uniform use and conversion.

6. Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueki in view of Engel as applied to claims 1-15 above, and further in view of Fressola.

The system as claimed is disclosed by the combination of Ueki and Engel together as stated in the rejection recited above for claims 1-15, but lacks the conversion with respect to the speed of light measuring system. Fressola teaches the standard relationship between the speed of light and the standard scales. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to expand the teachings of the combination of Ueki and Engel to include the speed of light system as taught by Fressola as another old and well known measuring system.

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Snyder discloses modifying a known scale by a defined percentage.
